

Physical Security Services

Background

Security in these days is not a luxury; Homeland security is an American term for "the national effort to ensure a homeland that is safe, secure, and resilient against terrorism and other hazards..."

Homeland or corporate security is widely needed whether it's physical site security, risk and threat assessments, training etc...

Our constant experience with security has made it imperative to develop operational and technological solutions.

Our teams, drawn from specialist military and law enforcement backgrounds, provide the client with solutions for full-scale security measures according to the risk analysis and the adversity, and its means of actions.

Why us?

Our personnel are drawn from specialist military and law enforcement backgrounds, providing close protection for defense and government departments on domestic and international assignments.

These high standards, founded by operating at the highest levels and in the most difficult of circumstances, are transferred to the corporate environment, ensuring that the same high quality of service, caliber of individuals and diplomatic methods are employed to positively influence your organization.

HP

We probe facility functions and threat paradigms. We delve into safety and security programs, policies, procedures, processes, technology and training – reviewing cost, value considerations and other operational requirements. Furthermore, we focus on your culture, mission and vision for appropriate implementation of any of our recommendations.

Key Services:

- Security Reviews and Audits
- Threat and Risk Assessments
- Penetration Testing
- Counter Terrorism and Malicious Corporate Targeting Consultancy

Security Consulting

The effectiveness of an organization's security program rests not on any individual program element, but rather on the interaction of each element. We assess each clients' security needs individually and comprehensively, partnering with you as your trusted security advisor to deliver a thorough risk and vulnerability evaluation of your unique security requirements. We evaluate assets and associated risks, threats and vulnerabilities. We assess new and modified risks based on crime trends and intelligence.

We will help in anticipating, identifying, studying and forecasting likely crisis situations and deciding on the specific methods your organization should employ to prevent and/or cope with incidents.

Key Services:

- Preparation of Incident Management Plans
- Implementation
- Review and Maintenance
- Training and Testing
- Evacuation Planning

Security Planning

It is impossible for organizations to eliminate all potential threats. However, in addition to implementing security measures to protect your most valuable assets, strategies and contingency arrangements should be developed to respond to incidents and to get back to 'business as usual' as soon as possible. Prompt and comprehensive recovery is vital to overcoming a crisis and minimizing further damage.

Training

We deliver training programs on a wide range of security subjects, with courses presented in several formats, such as eLearning, On-Site or Closed Company Workshops, to groups or one-to-one. Although most courses offer-standardized content, we regularly collaborate with clients to tailor the course to the specific needs of the participating individuals by undertaking a Training Needs Analysis prior to training delivery.

Typical Training Course Subjects:

- Hostile & Harsh Environment
- Conflict Management
- Traveler Safety
- Workplace Violence
- Crisis Management
- Security Evacuations
- Site and plant Security
